As a graphic designer, music composer & audio engineer, I offer services that enable me to contribute to the creative development of your project needs including video editing and compositing. I utilize my design skills to produce quality work for the development and advancement of any company who is needing someone passionate and making a high quality product right the first time. My passion is to use what I have and make it the highest quality in a time conscious situation.

I have extensive knowledge and skill in video editing, 3D Graphics, 2D Graphic Design such as Photoshop, Final Cut Pro, Lightwave 3D, Houdini 3D, InDesign, Illustrator and other Adobe software, Compositing, Web Design (Graphic Side of Web Page Design), Special Effects, Audio Engineering & Music Composition.

I have an excellent working knowledge in graphic design, audio engineering, and other media software. I have extensive experience in media studio operation, television broadcast, Mac & PC computers, live recording, mic techniques, music production on all levels, engineering, audio encoding/decoding, studio setup, & extensive problem solving skills. I am also trained with monochromatic screening for effects and other applications. Our specialization can be seen across the world from China, Poland, France, Australia, India and many other countries.
